# COVER ARTICLE: PREPARING TO FACE THE CHALLENGES

by Dr. Mousumi Bhattacharjee James

The global pandemic has thrust upon us situations not anticipated or even imagined by us at any time in 2019. All this came as a shock to the world when the global community was well progressing at a substantial pace. The world is still expected to change dramatically in the coming times. This unexpected disaster, the corona virus pandemic, has resulted in a tragically large number of human lives being lost, businesses being closed down, jobs lost, human lives effected; in conclusion the GDP of each country encountering a massive blow. The magnitude and speed of collapse in activity that has followed is unlike anything experienced in our lifetimes. As the global communities implement necessary quarantines and social distancing practices to contain the pandemic, the youth of today, the student community needs to anticipate an even more challenging time to come, inevitably requiring greater skills to compete for the job opportunities. This should develop in them an attitude to sharpen their skills and acquire newer competence, while at home. A beautiful quote “Yesterday is not ours to recover, but tomorrow is ours to win or lose.” by Lyndon B. Johnson, teaches us the certainty to move ahead with an optimistic approach.

The job scenario has been changing drastically all across the globe, with competition getting intensely fierce across almost all the professional segments. For engineers in the age of Artificial Intelligence and Automation, man and machines are somewhat at the same competitive level, each trying to supersede the other. In these trying time students must continuously keep honing their skills apart from just attending their online classes. An array of virtual technical courses are available which can be done remotely. Students need to work on certain skills like English communication, writing skills, active listening skills, presentation skills, willingness to work hard, stably working under pressure, dependability, positive self starter approach towards work related to the emotional intelligence quotient or EQ of an individual, which at most of the times decides the professional success of an individual. For engineers in their final year this time is apt to prepare for quantitative aptitude, logical and reasoning aptitude, prepare for technical and HR interviews, so that they can face the challenges ahead. This is the perfect time to sharpen their technical and non technical skills to build a profile to attract the potential employers.

Despite all the adversities, we’ve shown incredible resilience. We’ve adapted so well to these detrimental times and developed skills to deal with all the ordeals. So amidst these tying times lets all see the silver lining. Through the lens of optimism lets review it all. We will definitely find enough positivity to keep sailing ahead with a get-up-and-go attitude.

# WEBINAR ON "RESUME BUILDING AND PERSONAL INTERVIEW INSIGHT"

NHITM has been continuously engaging students in online academic and professional activities during the pandemic online study from home situation to update the skills of the students. In continuation of the same a webinar on Resume Building and Personal Interview Insight, was conducted online to create awareness about a well-structured resume which clearly highlights skills and experience to potential employers. This webinar was organized by NHITM in association with Career Launcher, on 4 September 2020, using google meet and streamed live on YouTube. The important takeaway points were, how to prepare an attractive resume, that appeals to the employers, and the skills to be highlighted.

The poster for the webinar features the Career Launcher logo with the tagline "NO DISTANCE IN LEARNING" and the NHITM logo. It includes a photo of a person holding a resume labeled "RESUME". The main title "R  sum   Building Personal Interview Insight" is in a large orange box, with "A Webinar" below it. The speaker is Navneet Anand, Business Head of the MBA-Prep Group. The event is on September 4, 2020 (Fri.) at 15:00 hrs, with a registration link at bit.ly/resumebuildingandpi.

The session started with the introduction of the speaker by Dr. Mousumi Bhattacharjee James, Training & Placement In-charge. The speaker was Mr. Navneet Anand B Tech MBA, Business Head MBA group, Career Launcher. The session concluded with question and answers which made it quite interactive. The event was streamed live on NHITM LIVE, NHITM's official YouTube channel. The Support and guidance of Dean Academics Dr. Sunil Bobade was immense. The event was planned well by Mr. Shrikant Baste, T & P Co In-charge and coordinated efficiently by Mr. Alkesh Bhalerao, T & P Branch Coordinator (Civil Engineering) and Mr. Jayesh Dhuri T & P Branch Coordinator (Mechatronics Engineering). The registration was free for the session and all participants who attended the session, received E-certificates.

# WEBINAR ON "UPSKILLING DURING COVID TIMES"

## NEW HORIZON INSTITUTE OF TECHNOLOGY & MANAGEMENT

*Presents*

### UPSKILLING DURING COVID TIMES

**SPEAKER-**

**ARKS SRINIVAS  
CEO-PRESIDENT**

**Date: 11/09/2020**

**Time: 12:30 PM**

Webinar will be broadcasted Live on our Official YouTube channel NHITM LIVE from 1230 PM

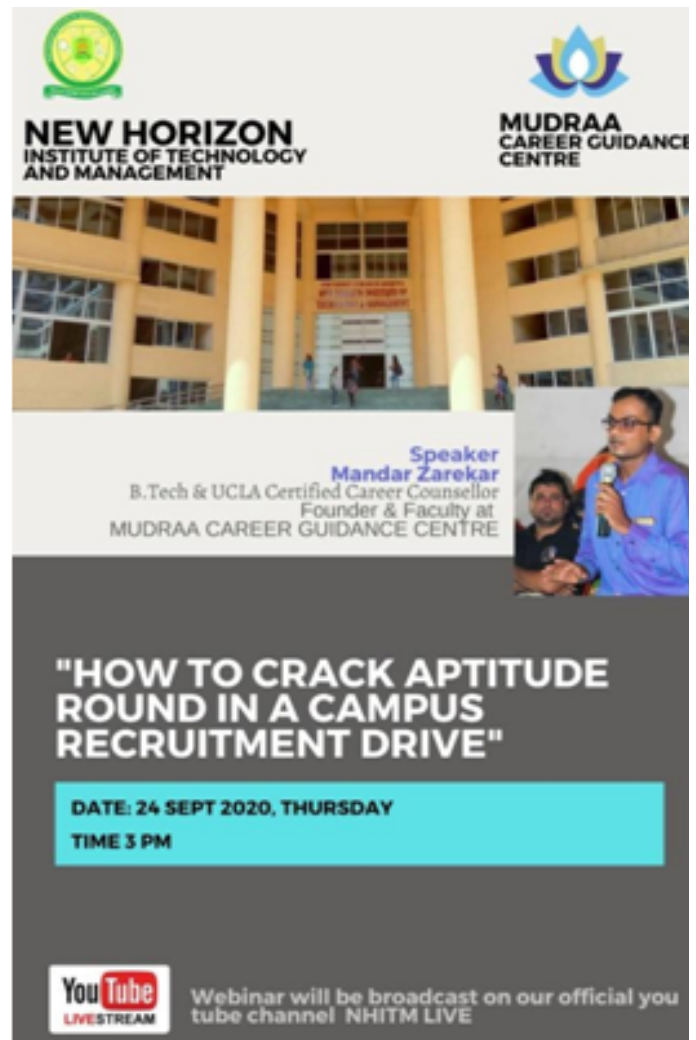

At NHITM we realize how important it is to keep the student updated during these unfavourable pandemic times. A webinar on Upskilling During COVID Times, was conducted online to create awareness among students about how they upgrade their skills even during the time they are restricted to the safety of their homes. This webinar was organized by NHITM in association with Career Launcher, on 11 September 2020, using google meet and streamed live on YouTube. The important takeaway points were, how to update their skills and prepare themselves for the challenging times ahead. The session started with the introduction of the speaker by Dr. Mousumi Bhattacharjee James, Training & Placement In-charge. The speaker for the webinar was Mr. Arks Shrinivas, BE Electronics and Communication from Osmania University and MBA from IIM Calcutta, President and CEO (MBA Group) at CL Educate Ltd.

The webinar was quite interesting, as the speaker included important tips to sharpen skills while at home and to prepare for the challenges ahead. He briefed the students regarding the technical skills which need to be enhanced and the benefits of pursuing an MBA degree after completion of engineering. The session concluded with question and answers which made it quite interactive. The event was streamed live on NHITM LIVE, NHITM's official YouTube channel. The event was coordinated efficiently by the placement team. The event was planned well by Mr. Shrikant Baste T & P, Co In-charge and coordinated efficiently by Mr. Azmat Javed T & P Branch Coordinator (Computer Engineering) and Ms. Tejashree Bahikar T & P Branch Coordinator (Electrical Engineering). The registration was free for the session and all participants who attended the session, received E-certificates.

# WEBINAR ON "HOW TO CRACK APTITUDE ROUND IN CAMPUS RECRUITMENT DRIVES"

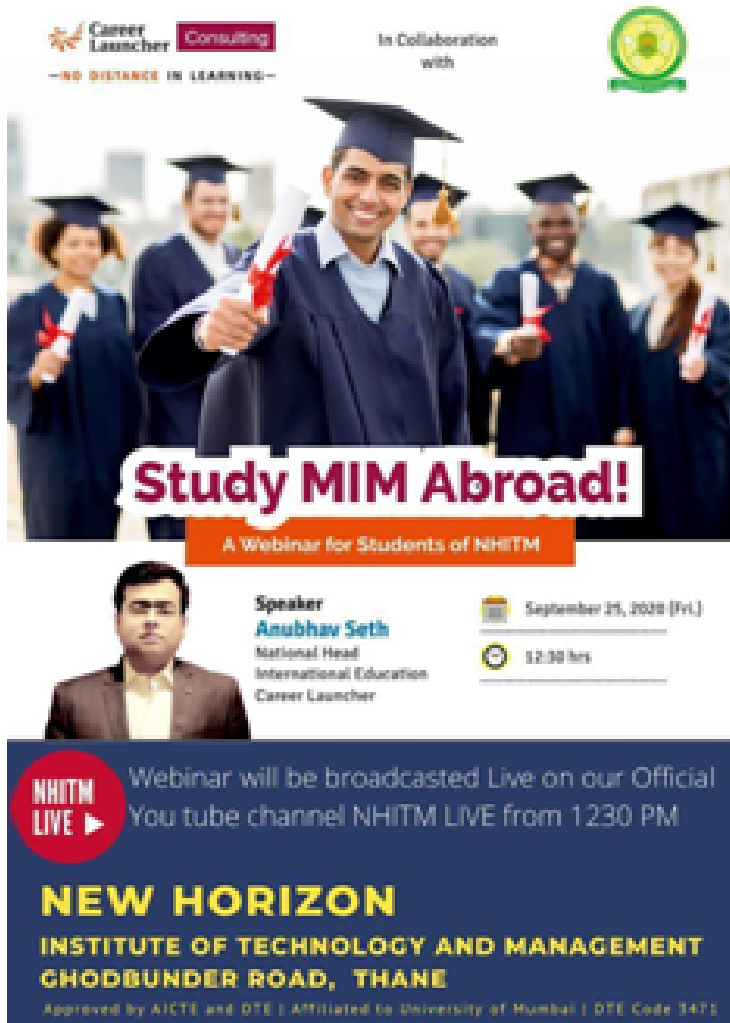

The Training and Placement team at NHITM headed by Dr. Mousumi Bhattacharjee James along with a dedicated placement team focuses on grooming the students and providing them with the right opportunities. The department creates awareness among the students regarding the importance of upgrading themselves for the eligibility tests and placement drives. One such skill is Aptitude, the first screening round in all placement processes. A webinar on How to Crack Aptitude round in Campus Recruitment Drives, was conducted online to create awareness among students about the techniques of clearing the aptitude round during placement drives. This webinar was organized by NHITM in association with MUDRAA Career Guidance Centre, on 24 September 2020, using google meet and streamed live on YouTube. The important takeaway points were how to prepare themselves for aptitude tests in these challenging times ahead.

The session started with the introduction of the speaker by Dr. Mousumi Bhattacharjee James, Training & Placement In-charge. The speaker for the webinar was Mr. Mandar Zarekar. Mr. Zarekar is Founder & Faculty at MUDRAA Career Guidance Centre, He is a B.Tech & UCLA, The University of California, Los Angeles Certified Career Counsellor. He has trained multitude of students from various colleges. The session concluded with question and answers which made it quite interactive. The event was streamed live on NHITM LIVE - NHITM's official YouTube channel. Mr. Shrikant Baste guided the team. The event was coordinated efficiently by Mr. Alkesh Bhalerao, T & P Branch Coordinator (Civil Engineering) and Mr. Rahul Bhosale, T & P Branch Coordinator (Mechanical Engineering). The registration was free for the session and all participants who attended the session, received E-certificates.

Many of our alumni are studying overseas in reputed universities. The Training and Placement team at NHITM regularly conducts sessions to create awareness in students regarding where and how to apply for studying overseas. A webinar on Study Masters in Management Abroad, was conducted online to create awareness among students about the benefits of Management Education from foreign universities. This webinar was organized by NHITM in association with Career Launcher, on 25 September 2020, using google meet and streamed live on YouTube.

The important takeaway points were how to prepare themselves for aptitude tests in these challenging times ahead.

The session started with the introduction of the speaker by Dr. Mousumi Bhattacharjee James, Training & Placement In-charge. The speaker for the webinar was Mr. Anubhav Seth National Head – International Education, Career Launcher. Mr. Anubhav Seth has ten years of work experience spread across technology, marketing & product management. Anubhav is passionate about helping young students to build a strong profile for a successful career and impactful application to top universities across the globe. He has mentored 500+ students successfully for admission to top global universities/ colleges like MIT, Yale, USC, GTech, ASU, HEC Paris, ESSEC, ISB, Rotterdam School of Management, King's College London and many others. The session concluded with question and answers which made it quite interactive. The event was streamed live on NHITM LIVE- NHITM's official YouTube channel. Mr. Shrikant Baste, T & P Co In-charge guided the team. The event was coordinated efficiently by Mr. Azmat Javed, T & P Branch Coordinator (Computer Engineering) and Ms. Tejashree Bahikar, T & P Branch Coordinator (Electrical Engineering). The registration was free for the session and all participants who attended the session, received E-certificates.

# STUDENT'S CREATIVE CORNER

## THE WORLD

By Ritesh Das  
Third Year Civil Engineering

In this world full of conflict and chaos,  
the mighty death being at the door.  
our mother nature is mourning and crying,  
for the immoral humans that she bore.

We humans fight for our religions,  
By putting our brothers into the fierce flame.  
And there is a lullaby of deep suffering,  
For a delusional paradise to blame.

And life is no evil but honorable,  
And death is free from eternity lame.  
We can choose to have some integrity,  
But we accept to play the devils suicidal game.

By saying the world is not a fine place,  
Why to insult something that is eternally create.  
We still have the chance to be better and rise,  
But we ignorant people want our vanities to be appreciate.

## Alumni Speak

I am proud to be a member of the NHITM foundation batch. NHITM not only served as a place for my growth as an academic student but also as an individual. I can proudly say that, the admirable ever guiding attitude of the faculty and the excellent academic environment, imbibed in us, so much incessantly. I can hardly imagine not being a part of anything that was happening around. And that gave us so much exposure and the experience that was needed for our intellectual growth. Yes, as a foundation batch, we did face some difficulties, but who doesn't in their college journey? We overcame all those stepping stones as a team since we had some or the other faculty always on our side, either supporting or guiding us. With every passing year, I crowned new achievements, starting as a topper in my first year and to being one among the six students that got placed in an MNC from our college in a campus drive while in my seventh semester. The most amazing thing about being a part of the foundation batch was to see the college grow with us. I can say that it was here that I found my confidence; it was here that I learnt those interpersonal skills which are so important for success.
